

CULTURE AND SCIENCE CAMPS: WATER

Now Accepting Applications!

Is water from the Rio Grande clean?

What do fish eat?

What tools do scientists use to do their jobs?

Learn New Skills!

Culture Content

Outdoor activities!

Fishing

SCIENCE AND FUN ON THE RIVER!

We'll be using both scientific tools and our own cultural and personal knowledge to answer questions about the health of our rivers, streams, and planet.

Over the course of the two days, you'll get a chance to work with Natural Resources Staff, elders, and community members to learn a bit more about the ecology of the river and how you can use this information in daily life, as well as design your own experiments, float the Rio Grande, and role-play as a group to develop community leadership skills

SESSION 1:
JULY 6 AND 7

SESSION 2:
JULY 20 AND 21

LOGISTICS:

OPEN TO HIGH-SCHOOL YOUTH.

TRANSPORTATION PROVIDED

LOCATIONS: SANDIA, RIO GRANDE,
JEMEZ RIVER
